

**Connect your business data to
enable smarter decisions**

What does connected data look like?

Sempre's **Connected Construction Assessment** is crafted to assist your housebuilding or construction company in fostering improved collaborative working, streamlining business processes, and leveraging data as a valuable asset to instigate transformation in the dynamic industry landscape. This transformation is achieved by cultivating a genuinely connected view of data across the entire business.

Connected Enterprise

Construction companies recognise the value of the data to know their customers, products, suppliers, partners, people and brands better and wish to unlock that insight.

Information Bottlenecks

Integrating data from across the organisation reduces information bottlenecks that can negatively impact customer satisfaction, health & safety and procurement.

Data Efficiency

An integrated view of company data can drive efficiencies across the business and can enhance the ability to quantify and prioritise those opportunities

Engage and Ignite

What's involved in a connected construction workshop?

The thought-provoking half-day workshop will be led by Sempre's Housebuilding & Construction Industry Lead, alongside key representatives from your organisation.

OBJECTIVE-DRIVEN WORKSHOP: Unlock insights with our workshop designed to:

- 1. Map and Review:** Explore your current application and data landscape for a comprehensive understanding of the data available to exploit.
- 2. Audit Integration:** Conduct a review of application integration and data lifecycles.
- 3 Unearth Challenges:** Identify and address existing difficulties, frustrations, and limitations within your architecture.
- 4. Strategic Clarity** Define your current and future business objectives that quality data can support

Transform challenges into opportunities

Outcomes

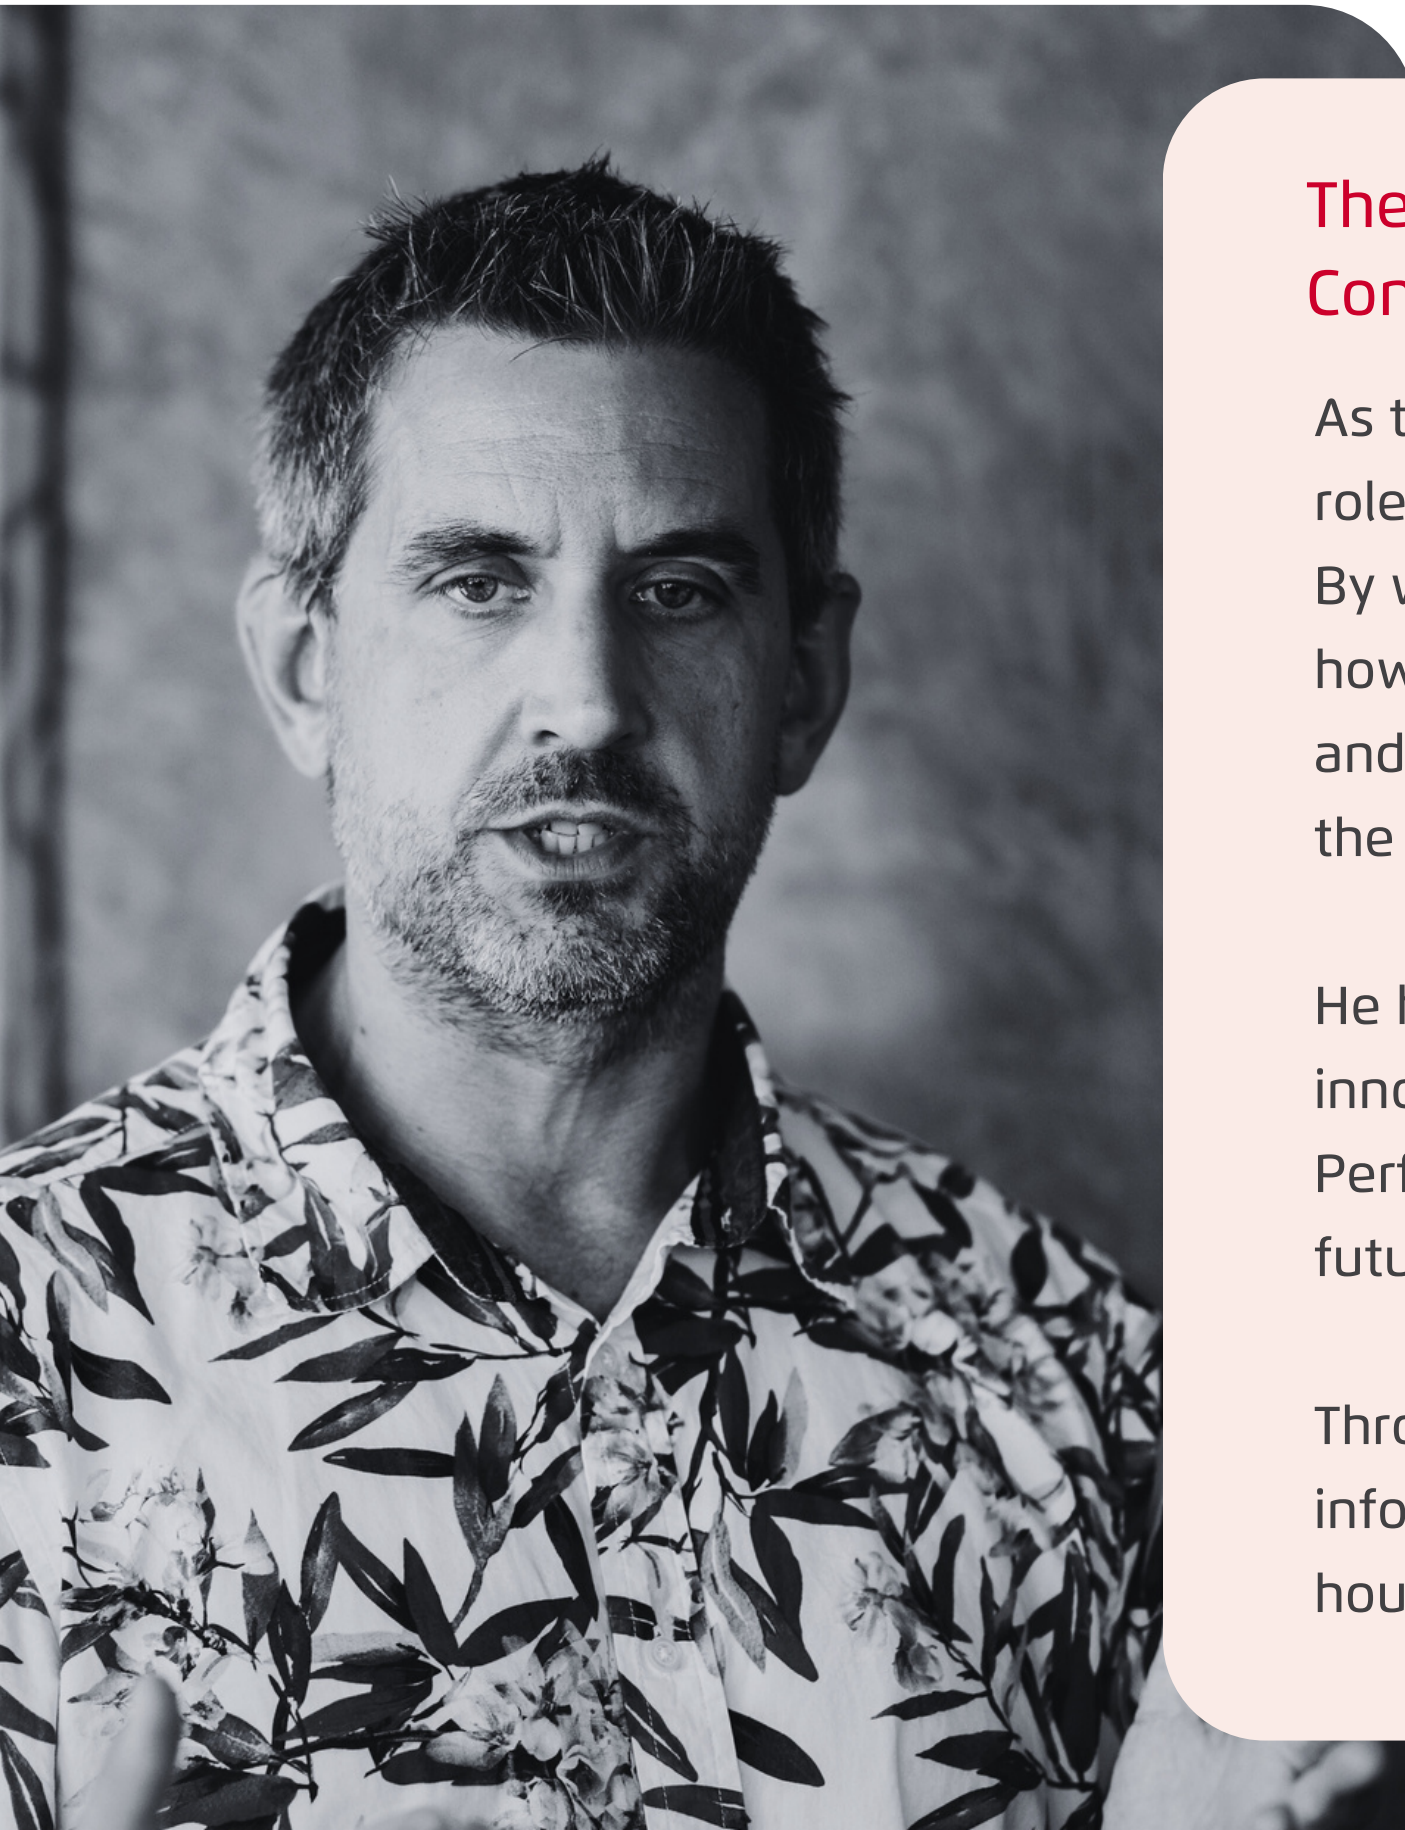

Workshop follow-up & Strategic Roadmap

Within one month of the workshop, Sempre will leverage its industry expertise to provide you with a comprehensive roadmap for implementing "Connected Construction" in your organisation.

- 1. Target Architecture:** Craft a robust architecture aligned with your business objectives for a seamless delivery of "Connected Construction".
- 2. Gap Analysis:** Conduct a detailed analysis, prioritising gaps between your current and desired states to maximise organisational value.
- 3 Strategic Initiatives:** Propose a set of initiatives to address identified gaps and propel your organisation toward its goals.

This half-day consulting engagement aims to showcase our proficiency in aligning organisations in construction with their strategic visions. While we hope to collaborate further on implementing the proposed initiatives, there's no obligation to do so. Likewise, Sempre reserves the right to decline a **Connected Construction Assessment** if we believe it's not the best fit for your journey.

Your success is our priority!

The workshop is run by our Industry Lead for Housebuilding & Construction, Richard Abraham.

As the Housebuilding & Construction Industry Lead at Sempre, Richard plays a pivotal role in guiding our clients through Connected Construction transformations. By working in partnership with clients, Richard advises on the digitisation of information, how to foster greater data connectivity, and optimising the utilisation of applications and data assets. His expertise lies in leveraging data-driven insights that complement the strategic initiatives of individual businesses.

He has delivered tangible results for clients, generating revenue, and providing innovative solutions by leveraging his proficiency in Business Intelligence, Financial Performance Management, and insightful data analytics spanning past, present, and future perspectives.

Through his strategic guidance, organisations can harness the power of data to make informed decisions and drive success in the ever-evolving landscape of the housebuilding and construction industry.
